

## Topical Collection

# Topic Advisory Panel Members' Collection Series: Immunization and Vaccines for Infectious Diseases

### Message from the Collection Editors

Our Topical Collection will be a "Topic Advisory Panel Collection" that will cover all the topics relevant to immunization for infectious diseases. Human history has faced several pandemic threats, including influenza, SARS2, and COVID-19. The big challenge in responding to pandemic diseases is that vaccines may not exist, or existing vaccines may not be effective against them. Therefore, this Special Issue will be an ideal forum where scientists can share their latest research findings on immunization and vaccines related to infectious diseases, particularly Influenza, SARS-CoV-2, HIV, and tuberculosis. In this Special Issue, original research articles, case studies, editorials, and reviews are welcome. We look forward to receiving your manuscript.

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /  
CiteScore - Q1 (Infectious Diseases)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
