

Special Issue

Recent Research on Adenovirus-Vectored Vaccines

Message from the Guest Editors

As we move forward from the COVID-19 pandemic and focus on both emerging and previously recognized pathogens, we invite you to contribute to a Special Issue on 'Recent Research on Adenovirus-vectored Vaccines'. The pandemic has provided valuable insights into the development of vaccines against coronaviruses and other viruses. Replication-deficient viral vaccines have been shown to effectively induce neutralizing antibodies and cellular immune responses, thereby providing adequate immune protection.

This Special Issue is an opportunity to address these experiences. **We are interested in studies that examine the persistence of immune responses after vaccination against SARS-CoV-2, other pathogens, or cancers, especially in comparison to other vaccine platforms. We also welcome comparisons among different types of adenovirus vaccines, including replicating, single-cycle, replication-defective, and helper-dependent variants and different serotypes.**

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,
University of Georgia, Athens, GA 30602-7387, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
