Animal Infectious Diseases and Vaccinology in One Health

Message from the Guest Editors

Many infectious diseases in animals cause significant damage to humankind. Exploring traditional and new solutions to mitigate these impacts is crucial. One approach involves the correct use of commercial vaccines and the implementation of new or autogenous vaccines. Additionally, where feasible, strategies can be developed to study and control diseases through understanding environmental factors and the interconnectedness of public and animal health, a concept known as “One Health”. These strategies can be valuable for various stakeholders in managing different infectious diseases. Original research articles and reviews are both welcome in this Special Issue.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
