

Special Issue

Protective Vaccine in Poultry

Message from the Guest Editor

This Special Issue, entitled "Protective Vaccines in Poultry," aims to bring together the latest research findings, innovative approaches, and comprehensive reviews that focus on the development, efficacy, and application of vaccines in poultry health management. We seek to explore the scientific advancements in vaccine technology, including novel antigens, adjuvants, delivery systems, and immunization strategies, that can enhance the protective capacity of vaccines against various avian diseases. The scope of this Special Issue encompasses a wide range of topics, including, but not limited to, the following:

- Innovative vaccine design and development for avian diseases;
- Immunological mechanisms of vaccine-induced protection;
- Comparative efficacy studies of different vaccine formulations;
- Vaccine delivery technologies and strategies for poultry;
- Impact of vaccination on poultry health and productivity;
- Economic and societal implications of poultry vaccination programs.

Guest Editor

Dr. Yongzhen Liu

Avian Immunosuppressive Diseases Division, State Key Laboratory for Animal Disease Control and Prevention, Harbin Veterinary Research Institute, Chinese Academy of Agricultural Sciences, Harbin, China

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,
University of Georgia, Athens, GA 30602-7387, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
