

Special Issue

Fish Disease Occurrence and Immune Prevention and Control

Message from the Guest Editors

This Special Issue focuses on "Fish Disease Occurrence and Immune Prevention and Control". The management of fish diseases is a global concern, and vaccines can provide immune prevention and treatment. There is a need for additional research on their disease pathogenesis and how the innate and adaptive immunity of fish can prevent and control fish diseases. The aim of this Special Issue is to collect cutting-edge research on host–pathogen interactions, fish immunity, immune effects, and the construction and application of vaccines. In addition to original research papers, comprehensive review articles are also welcome. We would like to invite you to submit your contributions to this Special Issue.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
