

## Special Issue

# Fish Disease Occurrence and Immune Prevention and Control

### Message from the Guest Editors

This Special Issue focuses on "Fish Disease Occurrence and Immune Prevention and Control". The management of fish diseases is a global concern, and vaccines can provide immune prevention and treatment. There is a need for additional research on their disease pathogenesis and how the innate and adaptive immunity of fish can prevent and control fish diseases. The aim of this Special Issue is to collect cutting-edge research on host–pathogen interactions, fish immunity, immune effects, and the construction and application of vaccines. In addition to original research papers, comprehensive review articles are also welcome. We would like to invite you to submit your contributions to this Special Issue.

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /  
CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
