Vaccine Efficacy and Safety in Patients with Immune-Mediated Intestinal Diseases

Message from the Guest Editors

Vaccination plays a crucial role in preventing infectious diseases and promoting public health. However, individuals with immune-mediated intestinal diseases, such as inflammatory bowel disease, celiac disease, and other related conditions, present unique challenges and considerations regarding vaccine efficacy and safety. Understanding the specific challenges and considerations is essential for optimizing vaccination strategies in this vulnerable population. This Special Issue aims to critically evaluate the current evidence regarding vaccine efficacy and safety in patients with immune-mediated intestinal diseases. It will explore the immune mechanisms underlying vaccine response alterations, the impact of immunosuppressive therapies on vaccine effectiveness, and the potential risks associated with vaccination in this population. Additionally, this Special Issue may discuss the available guidelines and recommendations for vaccination in this population, highlighting areas of uncertainty and areas that require further research. We encourage the submission of original articles, systematic reviews, meta-analyses, short communications, and other types of articles related.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,
University of Georgia, Athens, GA 30602-7387, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
