

Special Issue

Vaccine Against Sexually Transmitted Diseases

Message from the Guest Editor

This Special Issue, entitled "Vaccine Against Sexually Transmitted Diseases", of *Vaccines* highlights cutting-edge research and innovative strategies aimed at combating sexually transmitted infections (STIs) through vaccination. It features breakthroughs in vaccine development, targeting prevalent STIs such as human papillomavirus (HPV), HIV, syphilis, gonorrhea, and chlamydia. This Special Issue emphasizes the importance of preventive measures, equitable access to vaccines, and the integration of vaccination programs into public health initiatives. By showcasing interdisciplinary collaborations and emerging technologies, this Special Issue aims to foster dialogue among researchers, clinicians, and policymakers to enhance global health outcomes and reduce the burden of STIs.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

Editor-in-Chief

Prof. Dr. Ger Rijkers

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2026).
