

Special Issue

Vaccines for Pediatric Infectious Diseases

Message from the Guest Editors

We invite you to contribute to our Special Issue, "Vaccines for Pediatric Infectious Diseases." The goal of this series is to publish high-quality reviews and original research papers that showcase recent scientific and clinical developments in pediatric vaccinology. We aim to enhance our understanding of how both new and established vaccines can effectively prevent infectious diseases in children and explore how these advancements can inform public health actions. This Special Issue focuses on the pediatric setting; we hope to integrate existing evidence, acknowledge unmet needs, and guide future research and policy. This Special Issue will spotlight recent advancements in children's vaccines, provide critical summaries of new information, and discuss the potential benefits and risks associated with introducing new vaccines into pediatric vaccination schedules worldwide.

Guest Editors

Prof. Dr. Artur Sulik

Department of Pediatric Infectious Diseases, Medical University of Białystok, Białystok, Poland

Dr. Kacper Toczyłowski

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,
University of Georgia, Athens, GA 30602-7387, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
