Adjuvanted Influenza Vaccines

Message from the Guest Editors

One approach to improving influenza vaccines is to include adjuvants. An immunologic adjuvant is defined as a substance that acts to accelerate, prolong, or enhance antigen-specific immune responses when used in combination with specific vaccine antigens. Adjuvants are particularly beneficial for influenza vaccines administered during a pandemic, when a rapid response is required or for use in patients with impaired immune responses. To date, six adjuvants have been used in licensed human vaccines: Alum, MF59, AS03, AF03, virosomes, and heat-labile enterotoxin (LT). This issue will address the potential of novel adjuvant strategies to modulate innate and adaptive immune responses to facilitate the development of improved prophylactic or therapeutic vaccines. Submission of original articles and systematic reviews is welcome. Manuscripts will follow standard journal peer-review practices, and those accepted for publication will appear in the Special Issue, “Adjuvanted Influenza Vaccines”. We look forward to receiving and welcome your contributions.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,
University of Georgia, Athens, GA 30602-7387, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
