Adverse Events of COVID-19 Vaccines

Message from the Guest Editor

Although the vaccination is one of the effective protection against COVID-19 through the rapid development of COVID-19 pandemic, the unexpected adverse events (AEs) of vaccination has not been systematically reported. In order to identify adverse reactions after COVID-19 vaccination, safety studies considering various covariates, such as race, age, and specific diseases, are needed. In particular, research to secure safety for adolescents and children, as well as high-quality clinical studies to understand the association of side effects with cardiovascular diseases, such as diabetes, is urgent from a health perspective.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,
University of Georgia, Athens, GA 30602-7387, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
