Vaccines and Antibody-Based Therapeutics Against Infectious Disease

Message from the Guest Editor

Infectious diseases remain a global challenge due to their continual resurgence and persistence, impacting humans and agriculture. It is important to prevent these diseases and epidemics. Although there have been recent advances in preventive therapeutics, there is still a need to develop vaccines and antibody-based therapeutic disease interventions. New approaches are needed, whether prophylactic or therapeutic, to advance the field and achieve better outcomes. This Special Issue aims to update advances in vaccine and antibody-based therapies. The collection will address current research and the development of new technologies and welcomes review and original research articles focusing on new horizons of immunity and therapy against infectious diseases that emphasize preclinical and clinical vaccines, antibody-based prophylaxis, and treatment regimens.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

Editor-in-Chief

Prof. Dr. Ger Rijkers

Department of Health, Cognition and Behavior, University College
Roosevelt, 4331 CB Middelburg, The Netherlands

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
