

Special Issue

Impact of COVID-19 and Non-COVID-19 Vaccination in Special Populations

Message from the Guest Editor

The journal welcomes high-quality manuscripts that discuss the efficacy, effectiveness, safety and adverse events of either COVID-19 or non-COVID-19 vaccination in special populations. These special populations include, but are not limited to, the following: the very young, the elderly, pregnant women, patients who receive vaccination after prior infection, and immunocompromised patients. The manuscripts may be basic science papers, observational studies or interventional trials that aim to improve vaccine efficacy or minimize vaccine-related adverse events.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
