

## Special Issue

# Studies of Infectious Disease Epidemiology and Vaccination

### Message from the Guest Editors

It is crucial to understand the interactions between vaccination and the epidemiology of vaccine-preventable diseases in order to maximize the benefits of vaccines in high-risk populations, all of which is known as vaccine epidemiology. The study of this field involves choosing vaccines for inclusion in public health programs, determining vaccination strategies, monitoring vaccine performance, and measuring the progress and impact of vaccination strategies. It also facilitates the identification of age groups and populations at risk that could benefit the most from mass vaccination campaigns. This Special Issue focuses on studies addressing all aspects of vaccine epidemiology, from the evaluation of disease burden to the implementation and evaluation of vaccine policies. We welcome original research articles and systematic or narrative reviews. We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /  
CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
