

Special Issue

New Insights into Vaccination and Public Health: 2nd Edition

Message from the Guest Editors

The Special Issue aims to gather further evidence for the implementation of appropriate vaccination strategies that are decisive for the well-being of the individual and the community. Articles, systematic reviews or meta-analyses, short communications and brief reports, letters, or other types of articles addressing the multidisciplinary nature of these themes and their impact on public health, with reference to different population cohorts (infants, adolescents, adults, elderly, and at-risk populations) will be welcome in the second edition of this Special Issue. We look forward to your valuable contributions to this timely and impactful Special Issue.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,
