

## Special Issue

# New Insights into Vaccination and Public Health: 2nd Edition

### Message from the Guest Editors

The Special Issue aims to gather further evidence for the implementation of appropriate vaccination strategies that are decisive for the well-being of the individual and the community. Articles, systematic reviews or meta-analyses, short communications and brief reports, letters, or other types of articles addressing the multidisciplinary nature of these themes and their impact on public health, with reference to different population cohorts (infants, adolescents, adults, elderly, and at-risk populations) will be welcome in the second edition of this Special Issue. We look forward to your valuable contributions to this timely and impactful Special Issue.

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /  
CiteScore - Q1 (Infectious Diseases)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
