

Special Issue

Nanotechnology for Cancer Vaccines

Message from the Guest Editor

This Special Issue will focus on the innovative use of nanotechnology in the development of cancer vaccines. It will highlight research on nanoparticle-based delivery systems, nanoformulations of tumor antigens and adjuvants, and strategies to enhance immune responses against cancer. This issue seeks contributions that explore targeted and personalized nanovaccines, preclinical and clinical studies, and novel design approaches to improving vaccine efficacy, safety, and stability. By bringing together advances in nanotechnology and cancer immunotherapy, this Special Issue aims to provide insights into the next generation of effective cancer vaccines.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

Editor-in-Chief

Prof. Dr. Ger Rijkers
Department of Health, Cognition and Behavior, University College
Roosevelt, 4331 CB Middelburg, The Netherlands

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2026).
