

Special Issue

Immunologic Mechanisms of Diabetic Ulcers

Message from the Guest Editors

This Special Issue aims to give an overview of the most recent advances in the field of therapeutic approaches to control wound infections and promote wound healing. This Special Issue is aimed at providing selected contributions on advances in the therapeutic approaches and applications of immunomodulators to treat diabetic ulcers. Potential topics include, but are not limited to:

- Antimicrobial defenses;
- Immunomodulators strategies;
- Therapeutic approaches to control infection and promote wound healing;
- Mechanistic studies;
- Adverse effects of immunomodulators on wound healing;
- Identification of the molecular regulators;
- Identification of targets potentially useful in future clinical trials;
- Future perspectives for immunomodulators strategies.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

Editor-in-Chief

Prof. Dr. Ger Rijkers

Department of Health, Cognition and Behavior, University College
Roosevelt, 4331 CB Middelburg, The Netherlands

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
