

Special Issue

Promoting Vaccination in the Post-COVID-19 Era

Message from the Guest Editor

We are pleased to invite you to contribute to a Special Issue on the factors to consider in the global effort to promote vaccination in the post-COVID-19 era. Although vaccination is one of the most cost-effective ways of preventing disease, vaccine hesitancy has been included among the ten threats of global health, and vaccination coverage remains globally suboptimal, especially among adults. During the pandemic, numerous changes occurred that may contribute either positively or negatively to promoting vaccination in the era that follows. Although new challenges to vaccine acceptance have arisen following the introduction of the COVID-19 vaccines, the pandemic may have also acted as a golden opportunity for raising awareness on prevention issues in the population. In an effort to develop interventions that increase vaccination coverage in the post-pandemic era, investigating what people think and feel, as well as social influences and practical factors that may affect their motivation and ability to get vaccinated, is essential.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,
University of Georgia, Athens, GA 30602-7387, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
