

Special Issue

Viral Pathogenesis and Specific Host Factors from Coagulation to Comorbidities

Message from the Guest Editors

Understanding how viral infections cause disease is a dynamic field between studying viruses and host responses. The latter cannot only help us identify those patients at risk, but by in-depth analyses of the complex interplay between viral and host factors we can better understand viral pathogenesis. This Special Issue proposes the examination of specific host factors in virus infections. With a special focus on the response of the coagulation system and the interaction between the immunological and hemostasis response, the aim of this Special Issue is to highlight the different mechanisms, drivers, and modulators of viral pathogenesis, thereby paving the way to the identification of potential therapeutic host targets. We welcome review papers and original articles, but also perspectives, hypotheses, and opinion papers, that highlight recent findings in this area, with a particular emphasis on changes that underly specific host factors.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,
University of Georgia, Athens, GA 30602-7387, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
