

Special Issue

Vaccine Development for Swine Viral Pathogens

Message from the Guest Editor

This Special Issue invites contributions in the areas of swine virus vaccines and research against well-known and emerging swine viruses that challenge animal health. Our aim is to welcome articles on the development and evaluation of vaccines against virus infections. The scope of this Special Issue covers vaccine engineering, design, formulation, adjuvants, delivery, and testing, as well as novel approaches to the discovery and characterization of antigens or small molecules that may be the foundation for novel therapeutics and the associated immunological evaluation. The full experimental details must be provided so that the results can be reproduced, and computed data or files regarding the full details of the experimental procedure can be deposited as supplementary material.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,
University of Georgia, Athens, GA 30602-7387, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
