

Special Issue

Vaccines and Vaccine Preventable Diseases

Message from the Guest Editors

This Special Issue focuses on recent advancements to reduce the burden of VPDs and improve vaccine equity. We invite original reports and reviews addressing laboratory and clinical vaccine research, utilization, and immunization, including the epidemiology and burden of VPDs among at-risk adult populations; social determinants of health and vaccinations; nosocomial transmission and infection control; innovations in vaccinations; and overcoming barriers to vaccinations. We look forward to your submissions and collaboration in this critical endeavor to safeguard public health.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.
