Cancer Immune Research and Therapy

Message from the Guest Editors

Dear colleagues, This issue plans to focus on all the aspects involved in cancer immunotherapies with promising agents and approaches that are characterized as ideal candidates against cancer. In this Special Issue, original research articles and reviews are welcome. Potential topics include but are not limited to:

- Promising phytochemicals against cancers;
- Immunomodulatory response;
- Therapeutic strategies;
- Mechanisms underlying immunological changes;
- Adverse effects of phytochemicals;
- Identification of cancer prognostic biomarkers;
- Combinatorial strategies;
- Future perspectives for phytochemicals.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.
