

Special Issue

Immune Response against SARS-CoV-2

Message from the Guest Editor

This special issue seeks all types of manuscripts (e.g., reviews, research articles, and short communications) on the immune response in individuals infected or vaccinated against SARS-CoV-2. Both basic and applied research papers that aim to improve the understanding of the immune response against SARS-CoV-2, short- and long-term effects of host immune responses to SARS-CoV-2, improved diagnostic methods, vaccination-related immune response, and intervention strategies for the prevention and management of COVID-19-related autoimmune reactions are welcome. We cordially invite you to contribute to this special issue to advance our knowledge of SARS-CoV-2 and to discover together the means to overcome the pandemic. I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

Editor-in-Chief

Prof. Dr. Ger Rijkers

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
