

## Special Issue

# Immunopharmacology: Developing Immunomodulation and Immunotherapy Strategies for Tumors and Inflammatory Disorders

### Message from the Guest Editor

In this Special Issue of *Vaccines*, we focus on recent immunotherapeutic drug development, covering not only mAbs and its various applications, such as antibody-drug conjugates and single chain fragment variables, but also biologics and chemical compounds that regulate or modulate immune responses, which can also be utilized as vaccines or adjuvants targeting factors in the above diseases. In the area of immunopharmacology, we also hope to discuss strategies for overcoming issues related to adverse effects, leading to the improvement of therapeutic agents. Naturally, we also welcome original articles and reviews covering conventional immunopharmacological studies looking towards identification of novel drug targets and factors, or elucidating their mechanisms of action during immune reactions.

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

---

### Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,  
University of Georgia, Athens, GA 30602-7387, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /  
CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
