

Special Issue

Research in Immune Responses to Vaccines Antigen during Influenza A Infection

Message from the Guest Editors

Current vaccination strategies against influenza are clearly inadequate, primarily due to the ever-changing nature of the influenza viruses. Thus, a significant clinical need exists for better influenza vaccines that can provide broader and long-lasting protection not only in healthy individuals but also in highly susceptible groups such as the elderly. This Special Issue of *Vaccines* will cover all aspects of influenza vaccines in the hope that new ideas and latest results will aid development of better vaccination strategies against influenza infections.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,
University of Georgia, Athens, GA 30602-7387, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
