

## Special Issue

# Research in Immune Responses to Vaccines Antigen during Influenza A Infection

### Message from the Guest Editors

Current vaccination strategies against influenza are clearly inadequate, primarily due to the ever-changing nature of the influenza viruses. Thus, a significant clinical need exists for better influenza vaccines that can provide broader and long-lasting protection not only in healthy individuals but also in highly susceptible groups such as the elderly. This Special Issue of *Vaccines* will cover all aspects of influenza vaccines in the hope that new ideas and latest results will aid development of better vaccination strategies against influenza infections.

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /  
CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
