

Special Issue

Influenza Viruses Epidemiology and Vaccination: State-of-the-Art Research in Europe

Message from the Guest Editor

This Special Issue is focused on the design and implementation of suitable integrated systems of surveillance and of differential laboratory diagnosis that are, therefore, of crucial importance in the early identification of health emergencies, in order to enable the prompt containment of infections and coinfections in the population and facilitate the activation of adequate preventive strategies (including vaccination programs). Based on your extensive knowledge and experience, we invite you to contribute with original report, or review on influenza vaccines, other vaccines specifically designed for at-risk categories, on the prevention strategies of other future possible pandemics, and on epidemiological and virological influenza surveillance.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
