

Special Issue

HPV Vaccination: Basic and Clinical Research

Message from the Guest Editors

We are soliciting articles for a Special Issue of the MDPI journal *Vaccines*, entitled “Feature Paper of Vaccines and Women's Health”. Future studies about HPV vaccination are needed to evaluate clinical protection against disease recurrence in treated patients for all HPV-related diseases, with comprehensive postvaccination surveillance evaluating the reduction of recurrence risk. Three prophylactic vaccines against HPV infection are available and have been shown to prevent persistent HPV infection and precancerous cervical abnormalities, while therapeutic vaccines are not yet commercially available. Our call is addressed to papers covering any and all of these issues, focusing primarily on HPV vaccination from both clinical and basic research points of view.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
