Vaccines for COVID-19

Message from the Guest Editors

Three years after the spread of SARS-CoV-2, the virus responsible for the last global pandemic event, we can take stock of the past, present, and future of the SARS-CoV-2 virus. This includes, on one hand, the about 7 million deaths around the world caused by the virus (though this number could be an underestimation), but also, on the other, the vast range of pharmacological measures and vaccine options that did not exist in 2020. Because of the pandemic, health systems globally bordered on collapse, having to deal with extreme numbers of simultaneous cases. The situation today is far more manageable, though the virus continues to circulate and remains challenging to eradicate. The topics that I invite you to reflect on are as follows:

- The impact of vaccination on the general population;
- The impact of vaccination on the elderly population;
- The impact of vaccination on the population of so-called fragile subjects (immunosuppressed, sick, those with oncological problems or heart disease, etc.).

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,
University of Georgia, Athens, GA 30602-7387, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
