

## Special Issue

# Vaccines and Passive Immune Strategies in Veterinary Medicine

### Message from the Guest Editors

The aim of the issue will be to summarize the results and performances of the latest vaccines and passive immune therapies that are under development for animal diseases. We also invite data regarding the performance, stability and efficacy of products that have already been launched on the veterinary market. We also encourage authors to submit for publication their results from research teams working in the development of animals' models for vaccine potency testing. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following topics:

- Targeted subunit and VLP veterinary vaccines;
- mRNA and DNA vaccines for veterinary use;
- IgY therapies for animal diseases;
- Llama-derived nanobodies against animal diseases;
- Equine Fab antiserum to prevent and treat animal diseases.

---

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /  
CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
