

Special Issue

Mechanisms of Mucosal Immunoregulation and Allergy

Message from the Guest Editor

This Special Issue focuses on the recent scientific progresses that enhance our understanding on mucosal immunoregulation and allergy. Based on your expertise, we invite you to submit an original report, observation or review that identifies (i) environmental contributors, (ii) immune pathways to sensitization, (iii) mechanisms of tolerance induction, and (iv) recent advances in novel prophylactic and therapeutic measurements. Keywords:

- allergy
- mucosal immunology
- immune regulation
- environmental triggers
- microbes
- diet
- life style
- allergens
- inflammation
- tolerance

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

Editor-in-Chief

Prof. Dr. Ger Rijkers

Department of Health, Cognition and Behavior, University College
Roosevelt, 4331 CB Middelburg, The Netherlands

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
