

## Special Issue

# Factors Associated with COVID-19 Vaccination

### Message from the Guest Editor

Vaccination against COVID-19 is a global issue. Both the inhabitants of rich countries, as well as their vulnerable populations, and those of emerging countries have been and are concerned. Intrinsic and extrinsic barriers may have been encountered. Apart from effective access to and cost of vaccinations, a wide range of determinants may have impacted the effective distribution of COVID-19 vaccination and its boosters. In this Special Issue, we invite you to submit your work on the determinants of COVID-19 vaccination for evaluation. In particular, work that sheds light on the effect of social or geographical determinants, and on vaccine hesitancy would be appreciated. This Special Issue aims to make a useful contribution to understanding the determinants of vaccination in order to prepare for future health crises.

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /  
CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
