Factors Affecting and Strategies Enhancing the Willingness to Receive and Uptake of Seasonal Influenza Vaccination

Message from the Guest Editor

Seasonal influenza vaccination (SIV) can be helpful in reducing influenza outbreaks. The reasons that affect the willingness to receive SIV and the strategies to enhance this willingness are essential to public health. This Special Issue will compile original research reports and reviews on this topic. Research areas may include, but are not limited to, the following: (1) the levels and determinants of willingness to receive SIV, (2) strategies to enhance willingness and uptake, (3) facilitators and barriers to implementing SIV programs, and (4) the evaluation of SIV programs or interventions. We look forward to receiving your contributions. Yours sincerely,

Guest Editor

Dr. Paul Shing-fong Chan

Department of Psychology, The Education University of Hong Kong, Hong Kong, China

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
