

Special Issue

Vaccines and Immunotherapy for Inflammatory Disease

Message from the Guest Editor

This Special Issue focuses on the role of vaccines and immunotherapeutic strategies in preventing and treating inflammatory diseases. Inflammation is a crucial factor in the development of various chronic conditions, including autoimmune disorders, metabolic syndromes, and certain types of cancer. As our understanding of immune regulation improves, new therapeutic vaccines and targeted immunotherapies have emerged as promising tools to address abnormal inflammatory responses. We invite original research articles, reviews, and clinical studies that examine vaccine-based interventions, immune modulation strategies, biomarkers for vaccine efficacy, and the potential application of immunotherapies in inflammatory disease contexts. We particularly encourage contributions that connect basic immunology with clinical applications.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,
University of Georgia, Athens, GA 30602-7387, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
