

## Special Issue

# Vaccination Progress in COVID-19 and HPV

### Message from the Guest Editor

Vaccines to prevent SARS-CoV-2 infection are considered the most promising approach for curbing the COVID-19 pandemic. Over a year into the biggest vaccination campaign in history, more than 12.7 billion doses have been administered across 184 countries. The human papillomavirus (HPV) vaccine helps to protect against cancers caused by HPV, including **cervical cancer**, some **mouth and throat cancers**, and some cancers of the anal and genital areas. The current global COVID-19 pandemic threatens to derail the uptake of HPV vaccination in low- and lower-middle income countries, which has a major impact on the World Health Organization cervical cancer elimination strategy, which is dependent on HPV vaccination as well as cervical cancer screening and treatment. This Special Issue welcomes submissions across the broadest interpretation of these issues.

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /  
CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
