# Acceptance and Hesitancy in Vaccine Uptake: 2nd Edition

# Message from the Guest Editor

I am pleased to announce the second edition of the Special Issue "Acceptance and Hesitancy in Vaccine Uptake". This Special Issue will build on the research published in the first edition by identifying intervention strategies to overcome barriers to vaccination, reduce hesitancy, and increase uptake among diverse populations worldwide. We encourage submissions that share findings based on the application of innovative research methods to increase vaccine uptake. Research exploring human papillomavirus (HPV) vaccines is welcomed. For this Special Issue, we invite the submission of all types of papers, including original research articles, reviews, and short communications, with no restrictions on the type of submission. We look forward to receiving your contributions.

# **About the Journal**

# Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.
