

Special Issue

Elimination of Dog-Mediated Rabies through Vaccination—Target 2030

Message from the Guest Editor

In this Special Issue, articles covering the implementation, strategies, outcomes, impacts, hurdles, and experiences of anti-rabies (pre- and post-)vaccination programs in both human and animal sectors globally are invited. Furthermore, this Special Issue may review the processes that support the scale-up of intervention strategies, put forth the views on pragmatic considerations with special reference to the duration of campaigns and the size of the work force, and finally provide examples of hypothetical resource requirements for implementing successful mass dog vaccination.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
