

Special Issue

Vaccines Design Against Porcine Circovirus

Message from the Guest Editors

Many emerging and re-emerging diseases are significant global animal and public health threats. Vaccine development has attracted much attention as the most effective means of epidemic prevention and control. This Special Issue will compile the latest advances in porcine viruses and their vaccines. For example, single or combination vaccines related to porcine circovirus, including inactivated, genetically engineered, or mRNA vaccines and adjuvants; evaluation methods for immunization efficiency; and pathogenic/attenuation mechanisms related to the porcine circovirus vaccine are welcomed.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,
University of Georgia, Athens, GA 30602-7387, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
