

## Special Issue

# Promoting HPV Vaccination in Diverse Populations

### Message from the Guest Editors

This Special Issue seeks original research articles and reviews on HPV vaccination coverage and programs in diverse populations. We welcome research focused on groups underrepresented in HPV vaccine research including racial/ethnic minorities, adolescent males, sexual/gender minorities, vulnerable populations, and low- and middle-income countries. Topics of interest include, but are not limited to, the following:

- Vaccine coverage in underrepresented populations;
- HPV vaccination knowledge and awareness;
- Multilevel facilitators and/or challenges to HPV vaccination and programs;
- Impact of public health policy on HPV vaccination and programs;
- Implementation and evaluation of HPV vaccination programs;
- Cultural adaptations of evidence-based strategies to promote HPV vaccination;
- Interventions and programs supporting HPV vaccine acceptance.

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /  
CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
