

Special Issue

Vaccines against HIV and Other Viruses

Message from the Guest Editor

This Special Issue aims to include high-quality papers on topics within the field of HIV-1. We will consider manuscripts that investigate anti-viral and anti-HIV immunity, immunological responses to potential HIV vaccine antigens, the testing of HIV vaccine candidates in animals and humans, the delivery methods of HIV vaccine antigens, studies on vaccine adjuvants related to HIV vaccine development, and investigations of HIV vaccine strategies that aim to raise broadly neutralizing antibodies. It is our pleasure to invite you to contribute an original research paper or a comprehensive review article for peer review and possible publication in *Vaccines*.

Guest Editor

Prof. Dr. Michael Bukrinsky

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

Editor-in-Chief

Roosevelt, 4331 CB Middelburg, The Netherlands

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
