

# Special Issue

## Advances in Bacterial Vaccines

### Message from the Guest Editors

To achieve a more extensive understanding of recent scientific knowledge and trends in bacterial vaccine development, this Special issue is focused on the recent scientific and technical progresses made in this field. Based on your extensive knowledge and experience, we invite you to contribute with an original report, original observation or review, to highlight (i) improvements of traditional vaccines (ii) development of vaccines against diseases which currently have no licensed vaccines (iii) the use of new technologies for bacterial vaccines (iv) improved adjuvants (v) correlates of protection.

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the second half of 2024).
