

## Special Issue

# Vaccine Hesitancy and Child Immunizations: Rationales, Issues and Knowledge Gaps 2.0

### Message from the Guest Editor

Globally, infant and childhood vaccine coverage rates are still not high enough, with outbreaks of vaccine-preventable diseases occurring frequently even in high-income countries. Vaccine hesitancy is one of the factors explaining the suboptimal percentages of vaccination coverage, defined by the SAGE group as a “delay in acceptance or refusal of vaccines despite availability of vaccine services”. The decision not to vaccinate or delay vaccine shots comes from a complex decision-making process influenced by numerous factors related to population, context, environment, historical period, and single vaccine. This Special Issue focuses on the knowledge and strategies to reduce vaccine hesitancy and improve vaccination coverage rates in the group of infant and childhood. Submission of original articles, systematic reviews, short communications, and other types of article on related topics is welcome. Manuscripts should follow standard journal peer-review practices, and those accepted for publication will appear in the Special Issue on “Vaccine Hesitancy and Child Immunizations: Rationales, Issues and Knowledge Gaps”.

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /  
CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
