Vaccine and Vaccination: On Field Research

Message from the Guest Editors

Currently, Italy is one of the most organized countries with regard to their method of fighting this epidemic through a structured national vaccination strategy. The speed at which Italy is vaccinating its citizens has outpaced several other European Union countries, demonstrating its skill in using vaccinations in a strategic and efficient way. However, the efficacy of a vaccination campaign may be hindered by vaccine hesitancy in individuals. The healthcare systems of many countries have to counteract the spread of misinformation by unauthorized sources which threaten the immunization effort. In this context, we are pleased to announce the Special Issue "Vaccine and Vaccination: on field research in Italy". The Issue covers recent advancements in the preparation and use of vaccines in Italy. We welcome the submission of original manuscripts from outstanding researchers in this field. Research articles, brief communications, reviews and meta-analyses will be considered. Short proposals for submissions of papers can be sent to the Editorial Office (charlotte.chen@mdpi.com, vaccines@mdpi.com) for a preliminary evaluation.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,
University of Georgia, Athens, GA 30602-7387, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
