

Special Issue

Veterinary Vaccines and One Health

Message from the Guest Editors

We are delighted to announce the launch of a Special Issue focusing on “Veterinary Vaccines and One Health.” As zoonotic spillover events continue to increase in frequency, multiple strategies to control outbreaks are necessary to protect human health. Such a strategy is multi-faceted and relies on vaccine availability for companion animals, livestock, and wildlife. However, these require unique consideration for vaccine protocols to accommodate challenges such as distribution, repeat vaccination, and surveillance. In this Special Issue, original research articles, communications, reviews, and case studies are welcome. Research areas may include (but not limited to) the following: wildlife vaccine strategies, transmissible vaccines, companion animal preventative health, pre-clinical and clinical trials, and methods for assessing vaccine efficacy.

Guest Editors

Prof. Dr. Richard A. Bowen

Department of Biomedical Sciences, Colorado State University, Fort Collins, CO 80521, USA

Dr. Danielle Adney

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

Editor-in-Chief

Prof. Dr. Ger Rijkers

Department of Health, Cognition and Behavior, University College
Roosevelt, 4331 CB Middelburg, The Netherlands

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
