

## Special Issue

# Immunity and Vaccination against Bacterial Infections

### Message from the Guest Editor

Knowledge of the immune mechanisms involved in protection and the immunogenic determinants of a pathogen is generally essential for vaccine development. In this regard, the development of vaccines against intracellular bacterial pathogens, whose defense requires special immune mechanisms, presents a particular challenge. The aim of this Special Issue is to draw attention to research on bacterial infectious diseases, focusing on protective immune mechanisms and vaccine development. We invite you to submit articles for this Special Issue describing mechanisms of immunity to bacterial infections, immunogenic antigens of bacterial pathogens, systems of antigen delivery, and vaccination. We welcome both original research articles and reviews.

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /  
CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
