Vaccines Uptakes and Public Health

Message from the Guest Editor

Preventing an illness is pivotal to improving the health of an individual. Vaccination is a typical preventive health measure, which can be applied at any stage of an individual's lifespan. Since the first vaccine to prevent smallpox was developed two centuries ago, technological advances have drastically shortened the time taken to develop novel vaccines. Vaccines have become major tools for fighting against COVID-19 infection during the current pandemic and potentially against emergent pathogens such as monkeypox. However, multifactorial vaccine hesitancy has curbed the effectiveness of this preventive health strategy. Scientific research is vital for creating safe vaccines, addressing the issue of vaccine hesitancy, coordinating vaccine supply and demand, and devising prudent fiscal policies and effective communication strategies to strengthen vaccination implementation programs in several communities.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,
University of Georgia, Athens, GA 30602-7387, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
