Diagnosis and Treatment for Infectious Diseases

Message from the Guest Editors

Infectious diseases are illnesses caused by pathogens. The timely diagnosis of the pathogens causing disease is important for the prompt treatment of such infectious diseases. As antimicrobial resistance has increased in recent decades, the rapid detection of pathogens has become crucial to improve clinical outcomes and prevent the development of drug resistance. In this Special Issue, original research articles and reviews focused on all aspects of infectious diseases are welcome, especially those focused on diagnosis and treatment. The epidemiology of drug-resistant pathogens will also be considered. Research areas may include (but are not limited to) the following: surveillance studies conducted in hospitals and communities, newly discovered resistant pathogens, newly therapeutic strategies, new detection methods, and novel resistance mechanisms. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
