Veterinary Vaccines and Diagnostic Tools 2.0

Message from the Guest Editors

The lifesaving role of vaccination in the fight against SARS-CoV-2 provides a great reminder of the importance of vaccines controlling various animal diseases. During these periods, pathogens have posed a constant threat to the health and welfare of animals and to the humans who care for them, either directly or indirectly. Despite remarkable advances in treatments and diagnostics this century, vaccination remains the most effective means to protect animal populations from serious diseases. By improving our understanding of the various immune responses and their role in disease prevention, we can best harness the utilization of vaccines in the ongoing tussle between pathogens and their hosts. This Special Issue focuses on veterinary vaccines and diagnostic tools. Submissions of original articles, systematic reviews, short communications and other types of articles on related topics are welcomed. All manuscripts will follow standard journal peer review practices. We look forward to receiving your contributions to this Special Issue.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,
University of Georgia, Athens, GA 30602-7387, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
