

## Special Issue

# COVID-19 Vaccination and Globe Public Health

### Message from the Guest Editor

COVID-19 vaccination and other behavioral preventive measures can help to eradicate the ongoing pandemic. Globally, efforts are greatly needed to increase vaccine access, justice and equity. This Special Issue will gather original reports, reviews and meta-analysis focusing on the insights from global public health applied to the context of COVID-19 vaccination. The interests of this Special Issue include but are not limited to: (1) access and issues related to the booster dose of COVID-19 vaccines, (2) COVID-19 vaccination access, acceptance and uptake among disadvantaged groups (e.g., ethnic and sexual minority groups, children, elderly, slum communities) or in contexts where evidence is lacking, (3) evaluation of COVID-19 vaccination programs or interventions, and (4) impacts of COVID-19 vaccination on people's behavior, physical and mental health

### Guest Editor

Dr. Zixin Wang

The Jockey Club School of Public Health and Primary Care, The Chinese University of Hong Kong, Hong Kong, China

### Deadline for manuscript submissions

closed (28 February 2023)

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.
